

# Guideline SenSwap Devnet

## updated version

If you are already on devnet, skip steps 1-4. Take step 5: Farming.

If not, complete all the steps below.

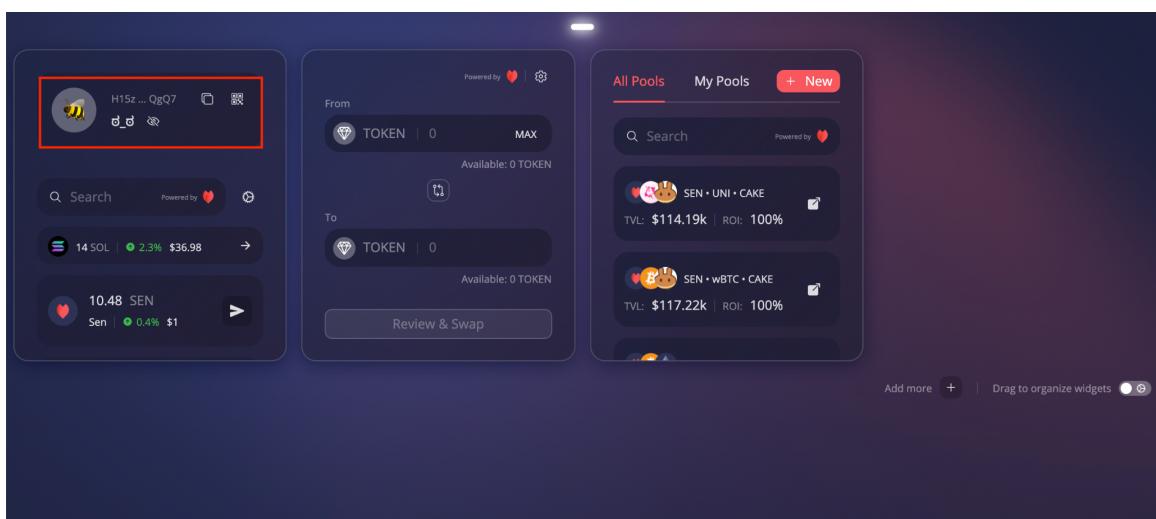

**Step 1:** Access **SenSwap Devnet** with the following link: [app.senswap.com](https://app.senswap.com)

**Step 2:** Click "**Let's Explore SEN**" and "**Connect Wallet**".

There are three wallet alternatives available here: [Coin98](#), [Phantom](#) and [Sollet](#).

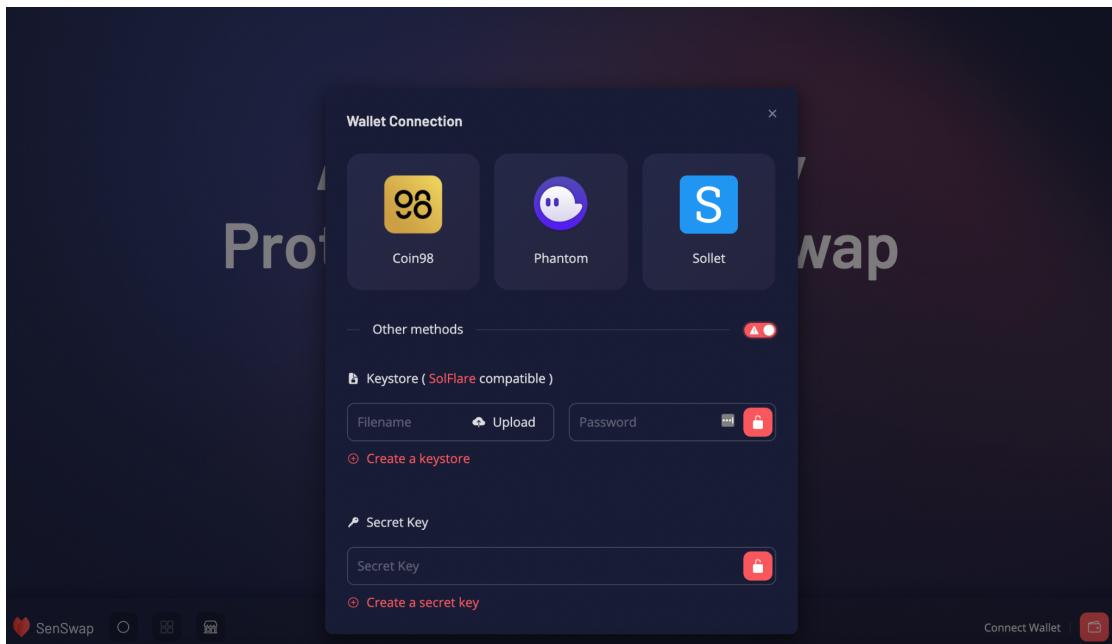

The wallet address will be shown here if the connection is successful.

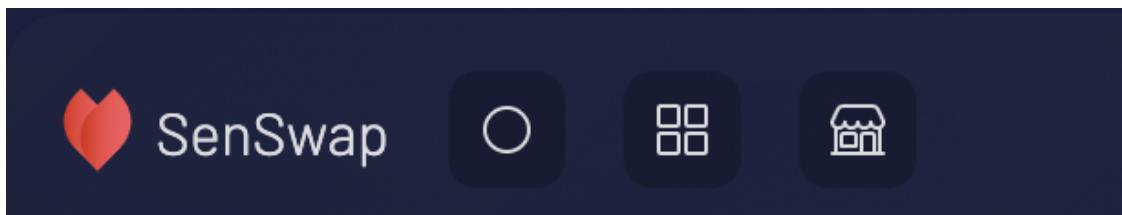

## Other methods

We do support creating a new Secret Key and Keystore. If you haven't already clicked "**Create a secret key**" to generate one. Save it for future use.

There are some advanced options including **Secret Key** and **Keystore**. Please make sure that you understand the risk when using these options.

On the homepage, there will be 3 options: **Home**, **Control Center** and **Marketplace**.

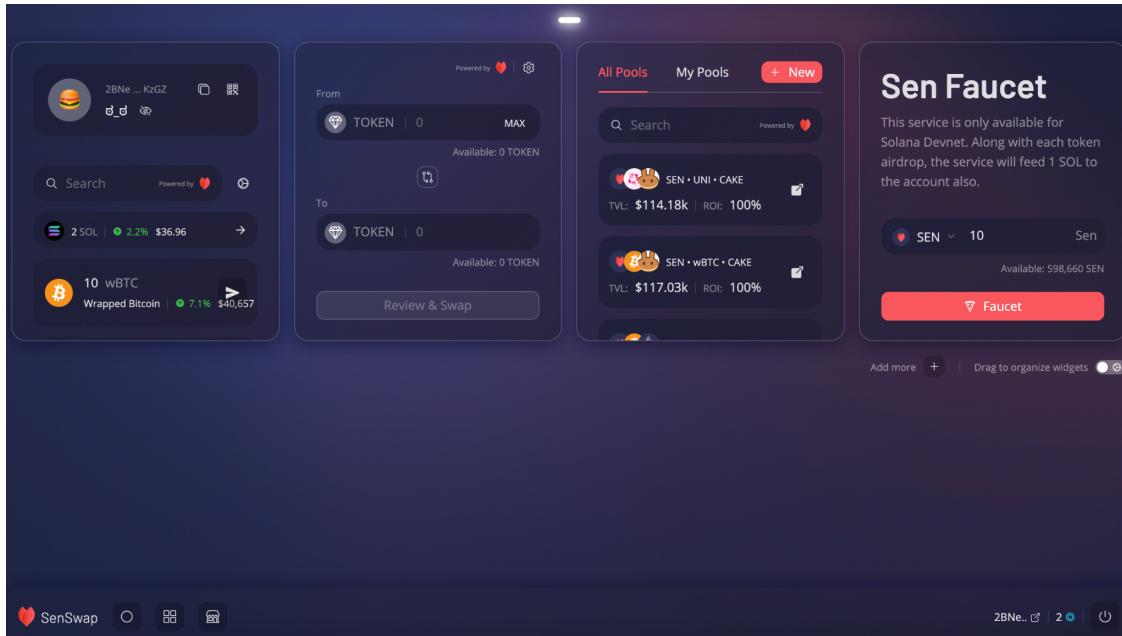

- **The Home** will navigate the main workspace.
- **The Control Center** will help you manage your workspace.
- **The Marketplace** includes many applications from the community and SenSwap. Here you can install apps you need.

### Step 3: Receive Tokens for testing.

Install Sen Faucet from Marketplace first.

There are three types of tokens: BTC, ETH, and SEN. Each time Faucet, you will receive 10 tokens. Once selected, click "**Faucet**".

### Step 4: Test out SenSwap's features.

Experience the features after completing the preceding steps

- **Swap**
- **Add Liquidity**  
(Require the implementation of both: **Single Side & Full Side**)
- **Withdraw**

You can verify your success by scrolling down the "Wallet" frame to review the assets in the wallet.

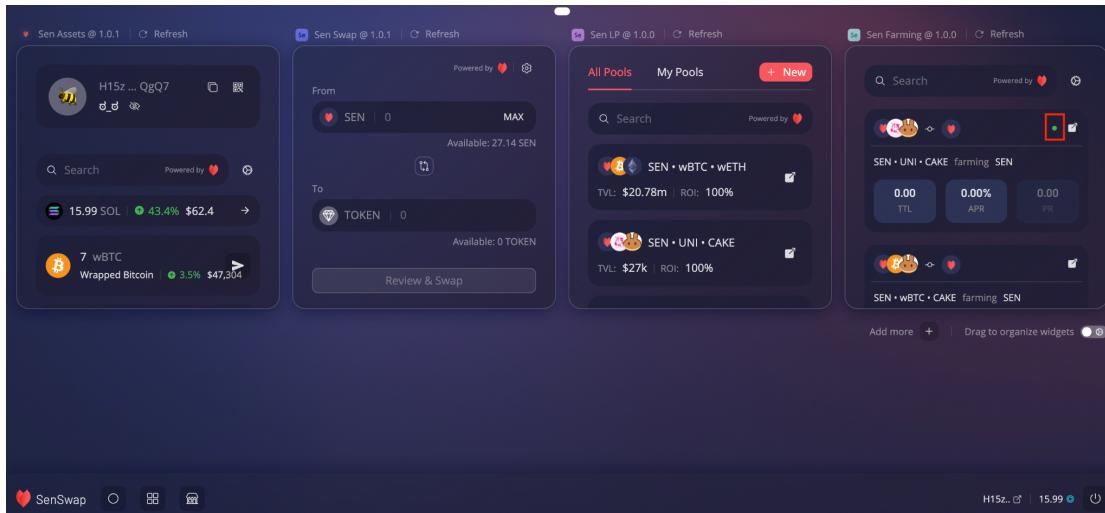

**If you encounter any issues or have any queries when implementing the functionality, please contact us directly for assistance.**

## Step 5: Farming.

Install Sen Farming from Marketplace first.

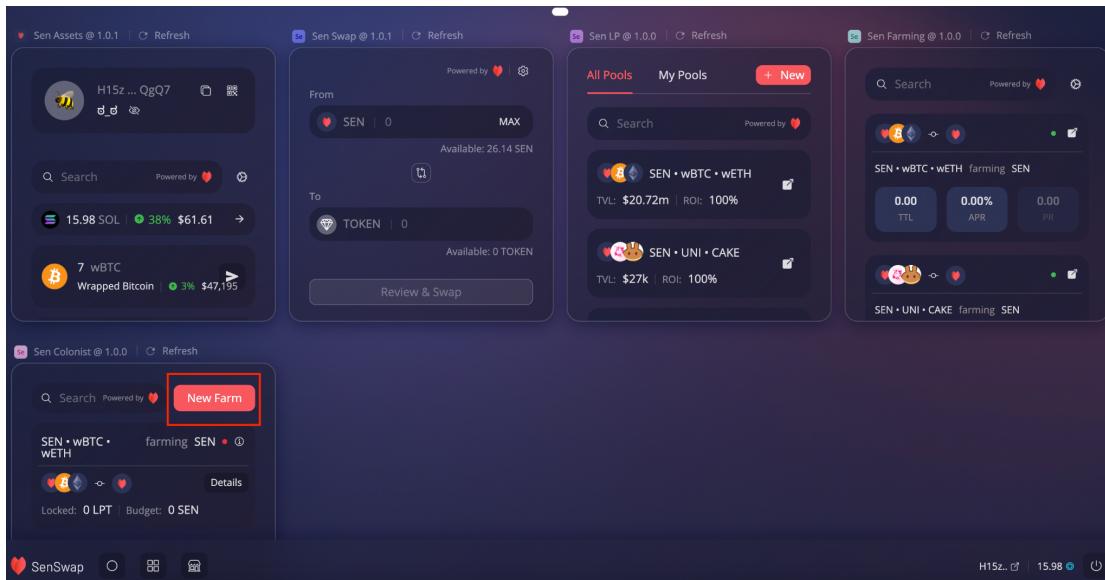

**Farm has 3 states:**

- Green dot: the farm have LPT => working
- Gray dot: the farm is freezing.
- No dot: the farm do not have LPT => not working

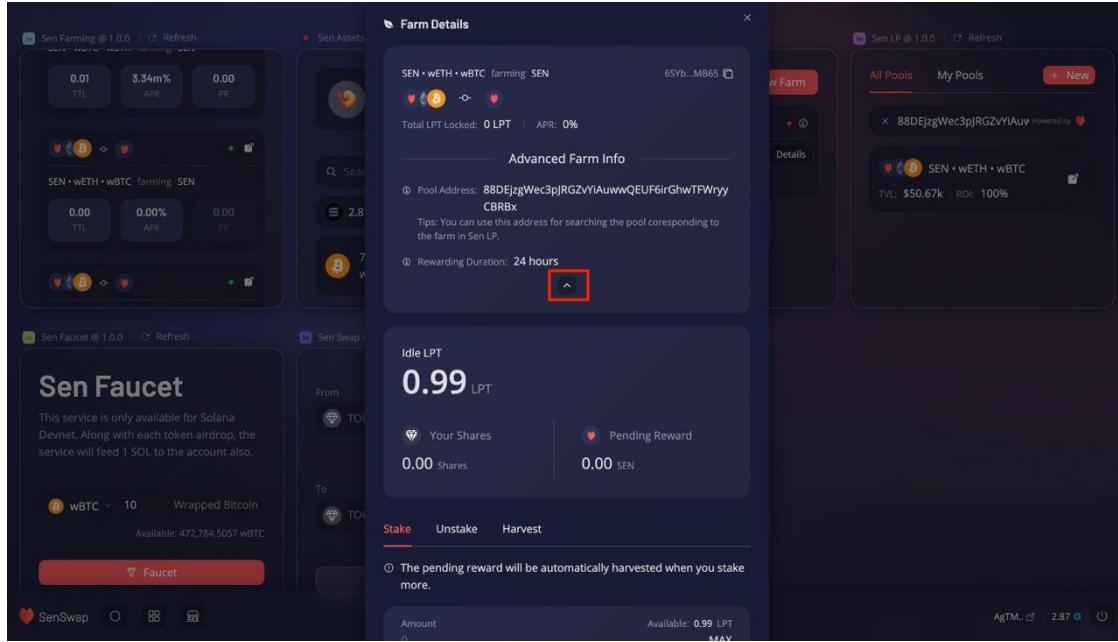

Each farm is created from 1 pool, each pool corresponds to 1 LPT.

Although the 2 pools use the same token types, they are still 2 different types of LPT. Therefore, if there is no farm you want, you can create a **New Farm** in **Sen Colonist**.

See information of Pool Address here. You can use this address for searching the pool corresponding to the farm in Sen LP.

## Step 6: Feedback

After testing Devnet, leave your feedback with wallet address **on #feedback-devnet Discord Channel** using the syntax: **Feedback + Wallet address**. Responses recorded in other groups will be deleted without notice

## Conditions for the reward

- Required to implement all features.
- To be deemed valid, leave Feedback the syntax: **Feedback + Wallet address**

The campaign is re-open on **9th August 2021** and ended on **20th August 2021**. You are welcome to join at any time during the above requested period.

**Randomly Reward:** 10.000 SEN divided equally among 50 wallets.

**Feedback Reward:** The 3 best Feedback on Discord Channel will get 200 SEN in each wallet.

Follow SenSwap's social channels to stay up to date on the latest news and results.
