

Sentre

# The DApp Store on Solana

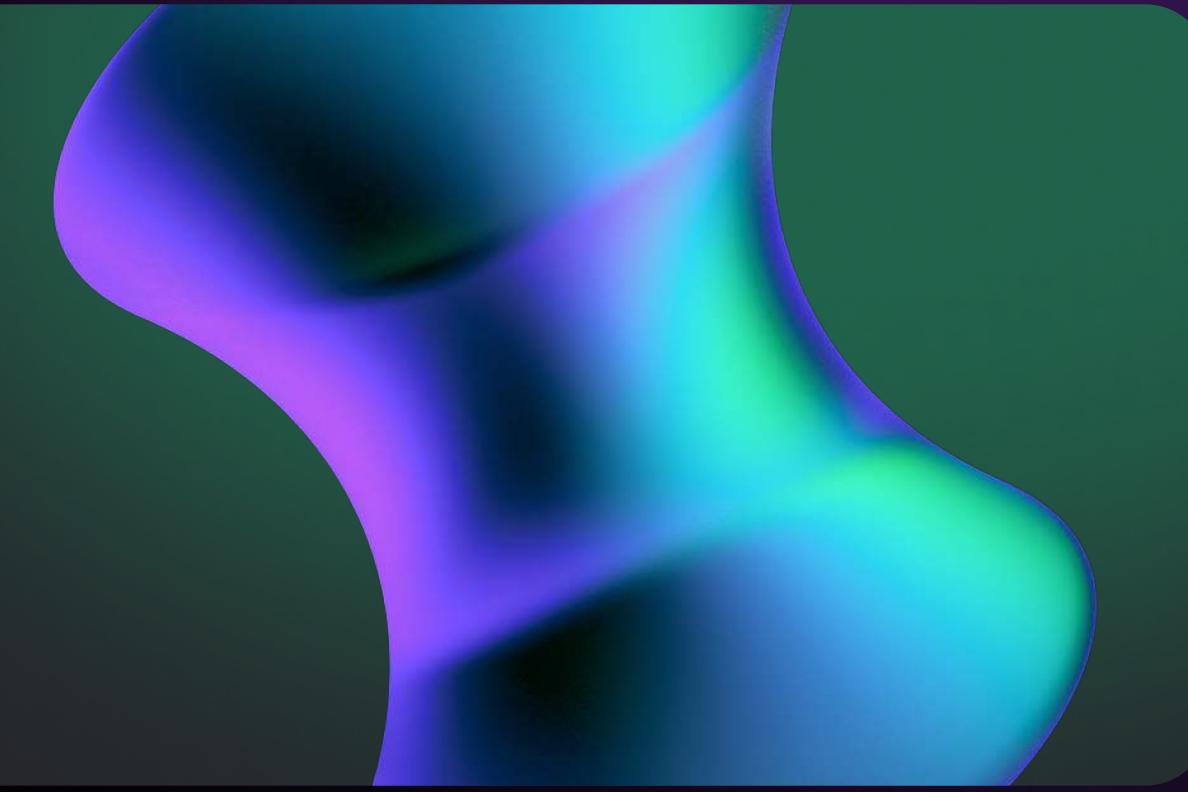

<https://sentre.io>

# Problems

1

## DApp Store

- Insecure environment to users because of lack of information
- Delay in product shipping
- Inefficient & Expensive marketing activities
- Weak connection between projects and users

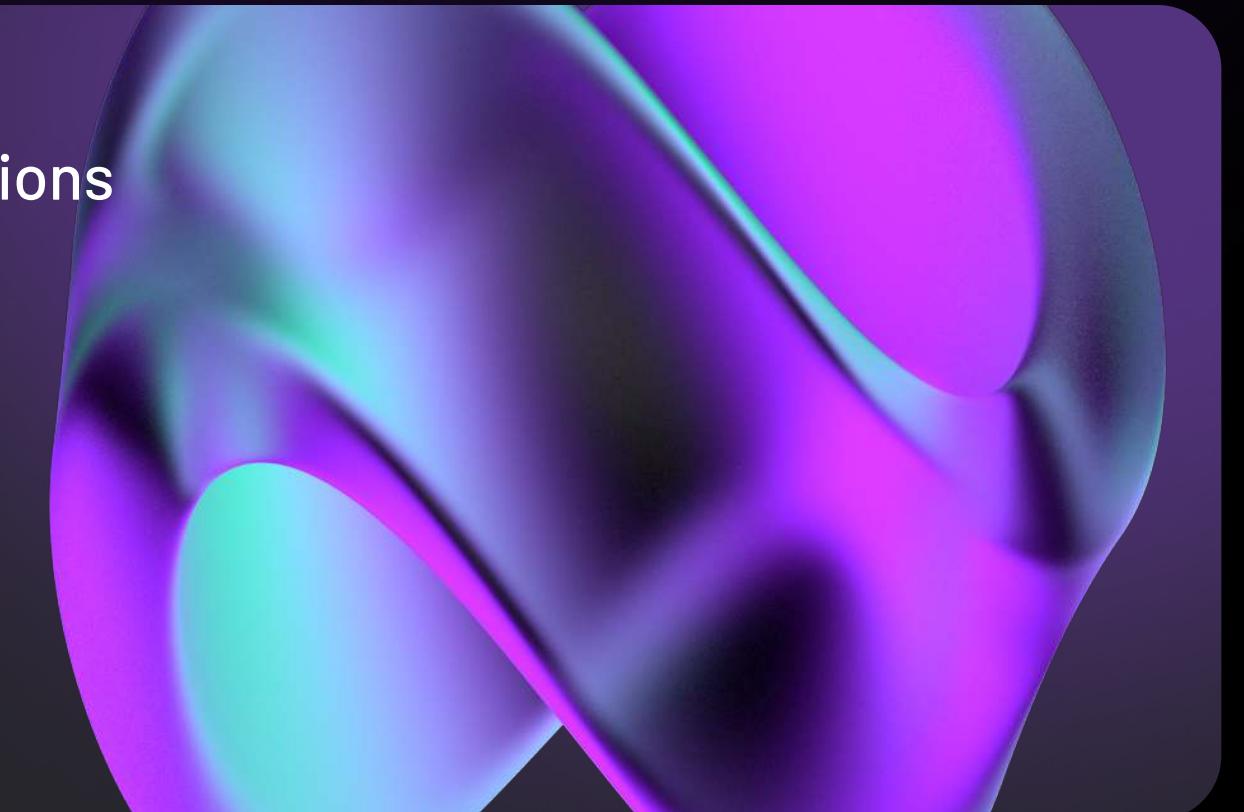

2

## Multisig

Because of the differences between Solana Stateless Multi-Instructions Transaction and other EVMs' Transaction, it outdates the current approach of multisig on Solana:

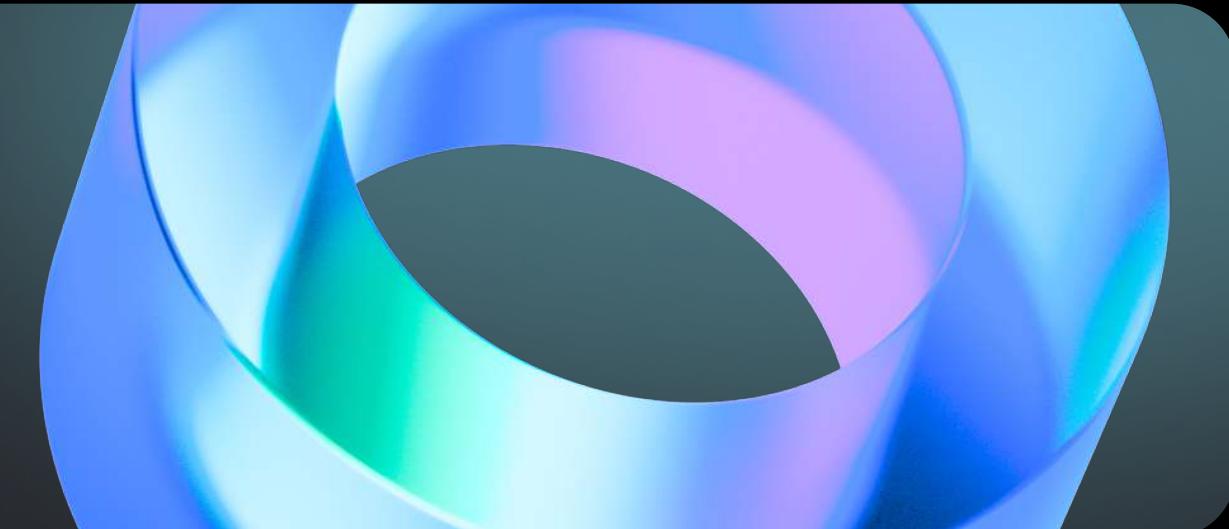

- Slow adaption to new protocols
- Technically & Financially expensive

3

There is no fully functioning Balancer-like AMM on Solana

## Balansol

# The Market Size

**1.8b txs  
\$450k**

**\$22.5k for  
5%**

**DApp Store**

Excluded validators' transactions which is 90%.  
The valuation is estimated at \$50 SOL and 0.000005 SOL on fee.

**\$1mil**

**\$200k for  
20%**

**Multisig**

Gnosis proposes market size around \$15mil on Ethereum. Based on both blockchain's marketcaps, Solana is predicted with \$1mil for multisig market.

**\$26mil**

**\$26mil for  
100%**

**Balansol**

Annual Derivation from 24h Vol Eth and Sol respectively  
\$900mil Uniswap - \$150mil Curve - \$40mil Balancer  
\$41mil (Orca & Raydium & Serum) - \$3mil Saber - \$750k Balansol

# Senitre Solutions

## Senhub

- A complete solution for DApp development.
- Highly secure and customizable workplace to users.
- Notifi system to build robust connection between projects and users.

DApp Store

## Sen Safe

- A custodial multisig.
- Auto integration with no preconfig required.

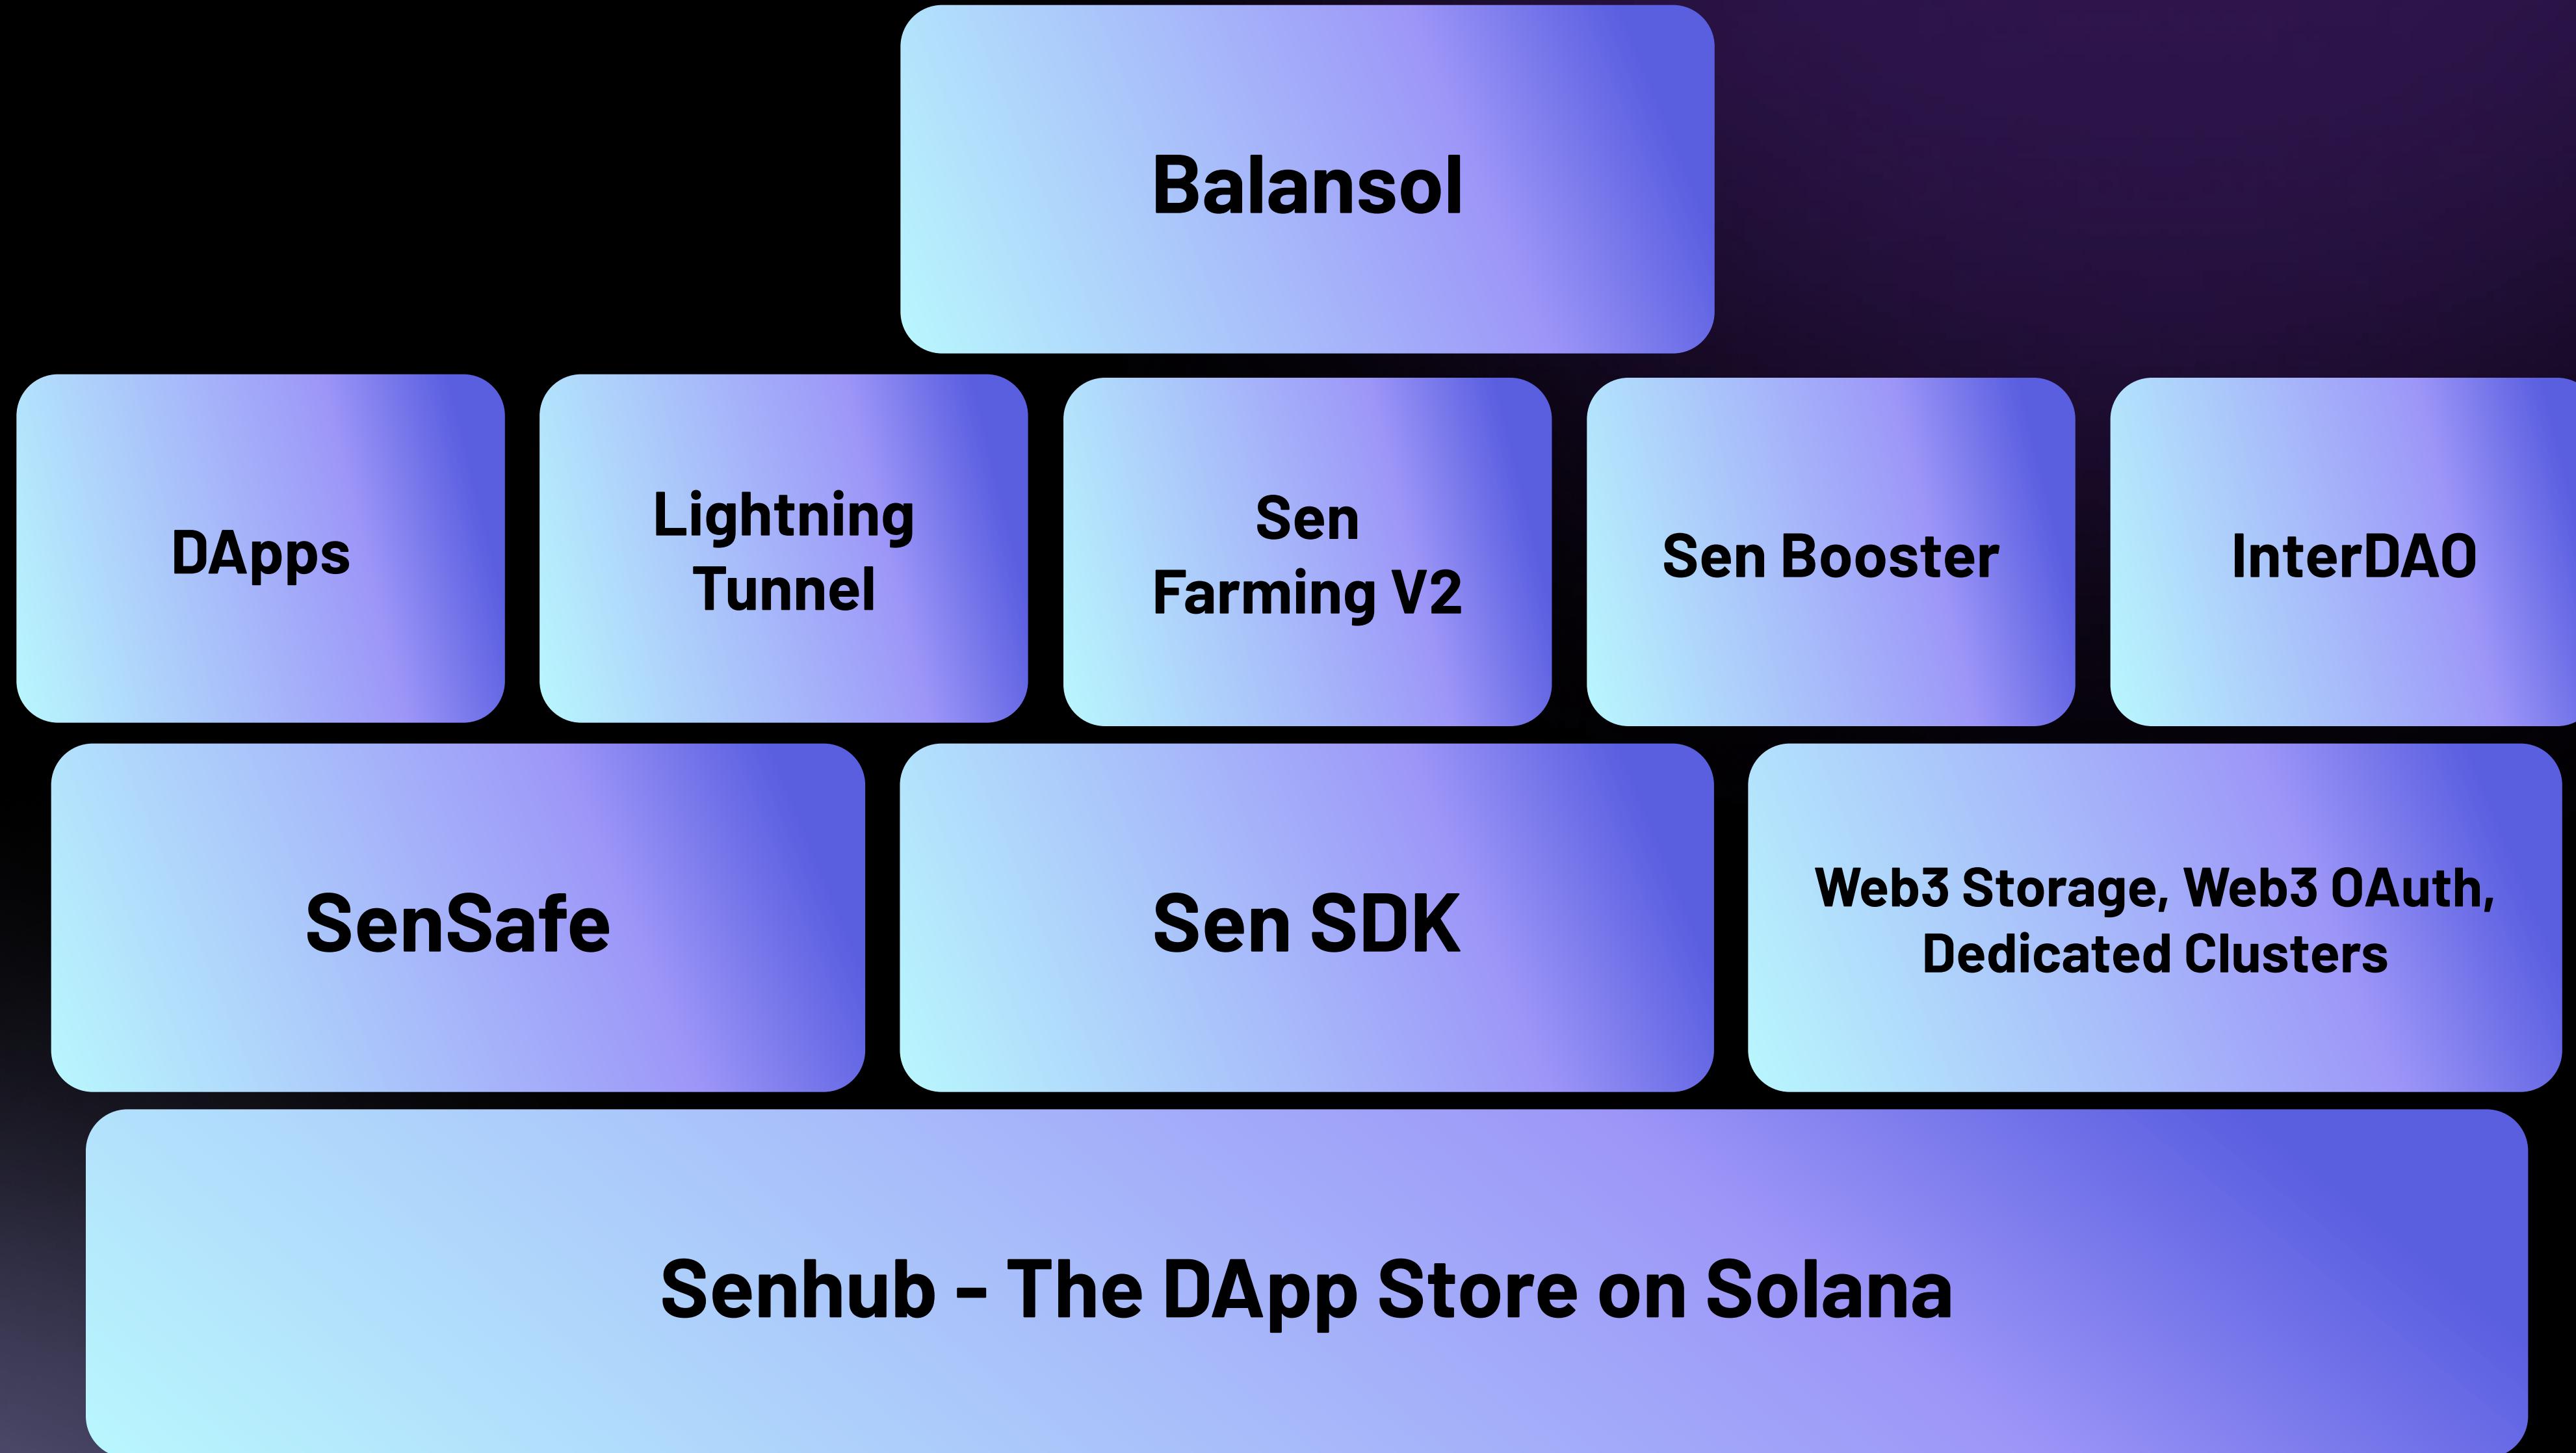

Multisig

## Balansol

- The first Balancer-like AMM on Solana.
- Single side lockers for risk management process.
- Permissionless.
- Derivative products friendly.

Balansol

# Roadmap

## Q3/2021

- Build SenSwap - The simplified idea of Balansol
- Whitepaper
- #2 Prize in Inaugural Solana Hackathon

## Q4/2021

- Fundraising
- Grow community
- Bootstrap liquidity in SenSwap and Sen Farming v1
- Integrate CoinMarketCap, CoinGecko, DefiLlama
- Listed on Gate.io

## Q1/2022

- #2 Prize Convergence - Serum & Wormhole Hackathon
- #5 Riptide Solana Hackathon
- Develop the backbone for Senhub

## Q2/2022

- Publish Sen SDK, Sen Connector
- Grow the number of DApps and user-base by a B2B2C strategy
- Vietnam Coding Camp I
- Release Lightning Tunnel
- Release the new look of the DApp Store

## Q3/2022

- Focus on in-house products and grow user-base by a B2C strategy
- Release Balansol
- Release AnyArts
- Release Sen farming v2
- Release Sen Booster
- Release InterDAO

## Current Achievements

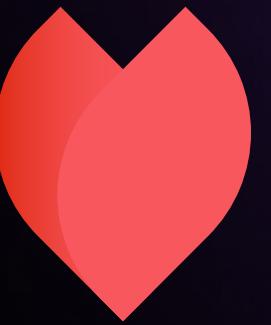

- 43.6k followers on Twitter
- 30k members on Telegram
- 300 developers in incubation group
- 15k transactions was generated on the platform (5k monthly)
- 8.3k users
- 24 DApps & Games including Solend, Lido, Hedge, Defiland
- The Solana Strategic Partner in Vietnam

## Q4/2022

- Rebrand Sen Connector to SenSafe and deploy Multisig Auto Integration
- Vietnam Coding Camp 2
- Bootstrap Balansol liquidity

## 2023

- Hanoi Hacker House
- Starter Kit to help new community projects can easily do a token launch, token distribution, vault protection.
- NFT Domain
- zkSwap
